

Vacation Confirmed

Project Team: Sabahat Khan, Quinn Luong, Allen Z., and Daryl Redmond

DIRECT TO PUBLIC

NO COMMISSION

NO AGENTS

POWERED BY BLOCKCHAIN

Adieu Token – smart contract and token that allows for direct interaction between property owner and short-term renter

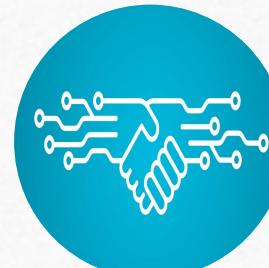

Blockchain

Ethereum Token

ERC-721

Dual-Series
Token

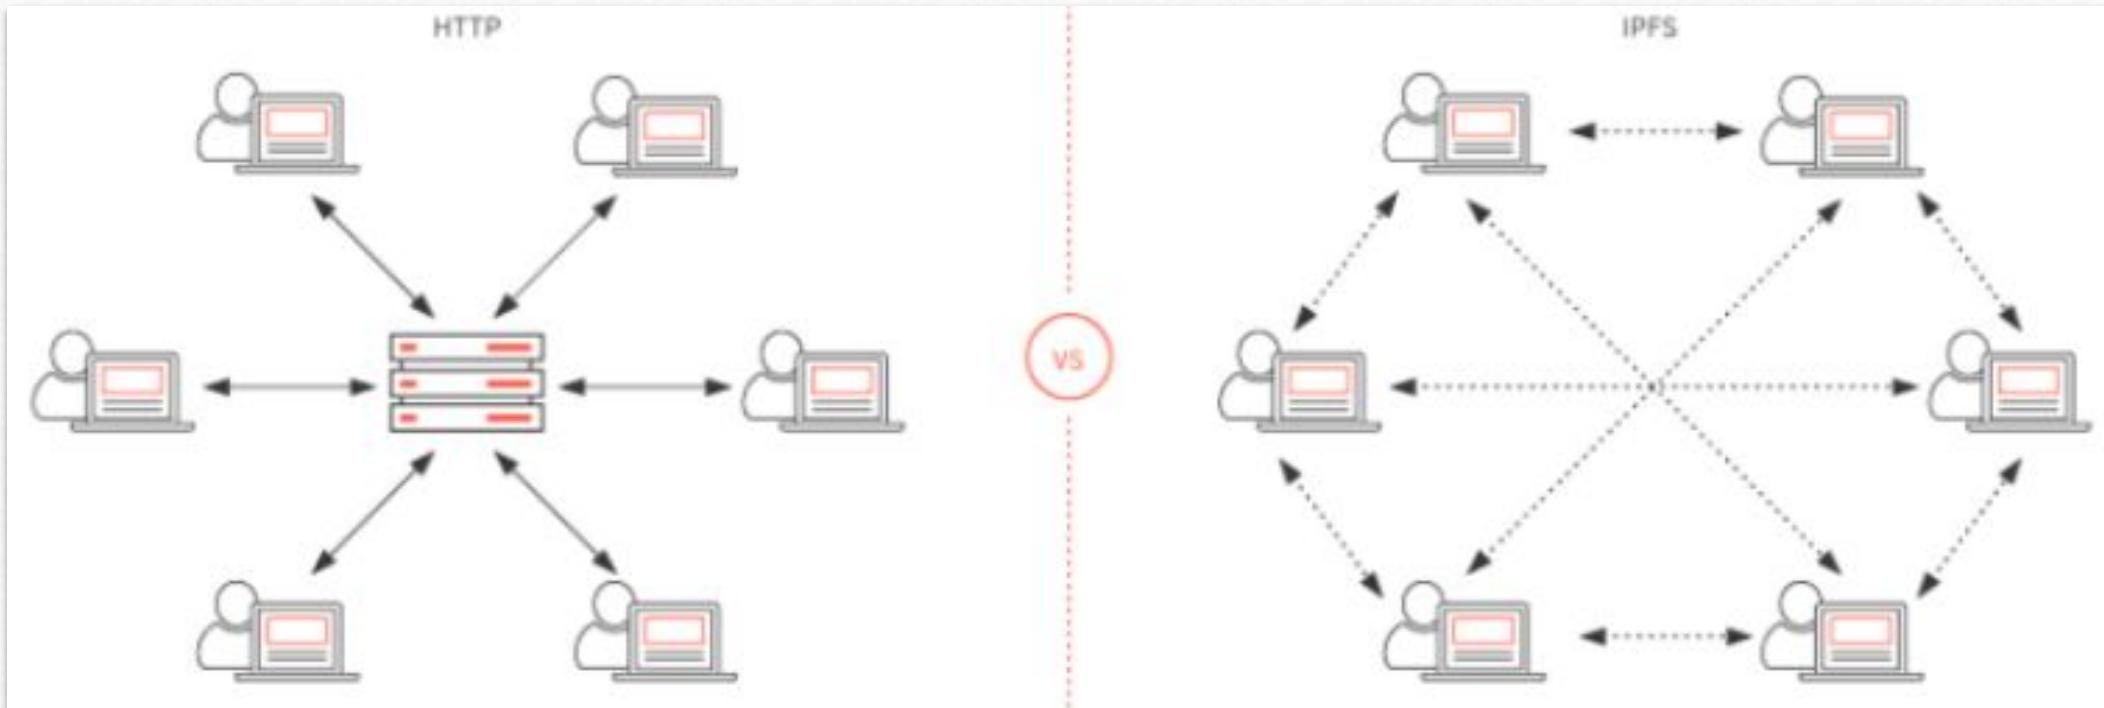

DEMO

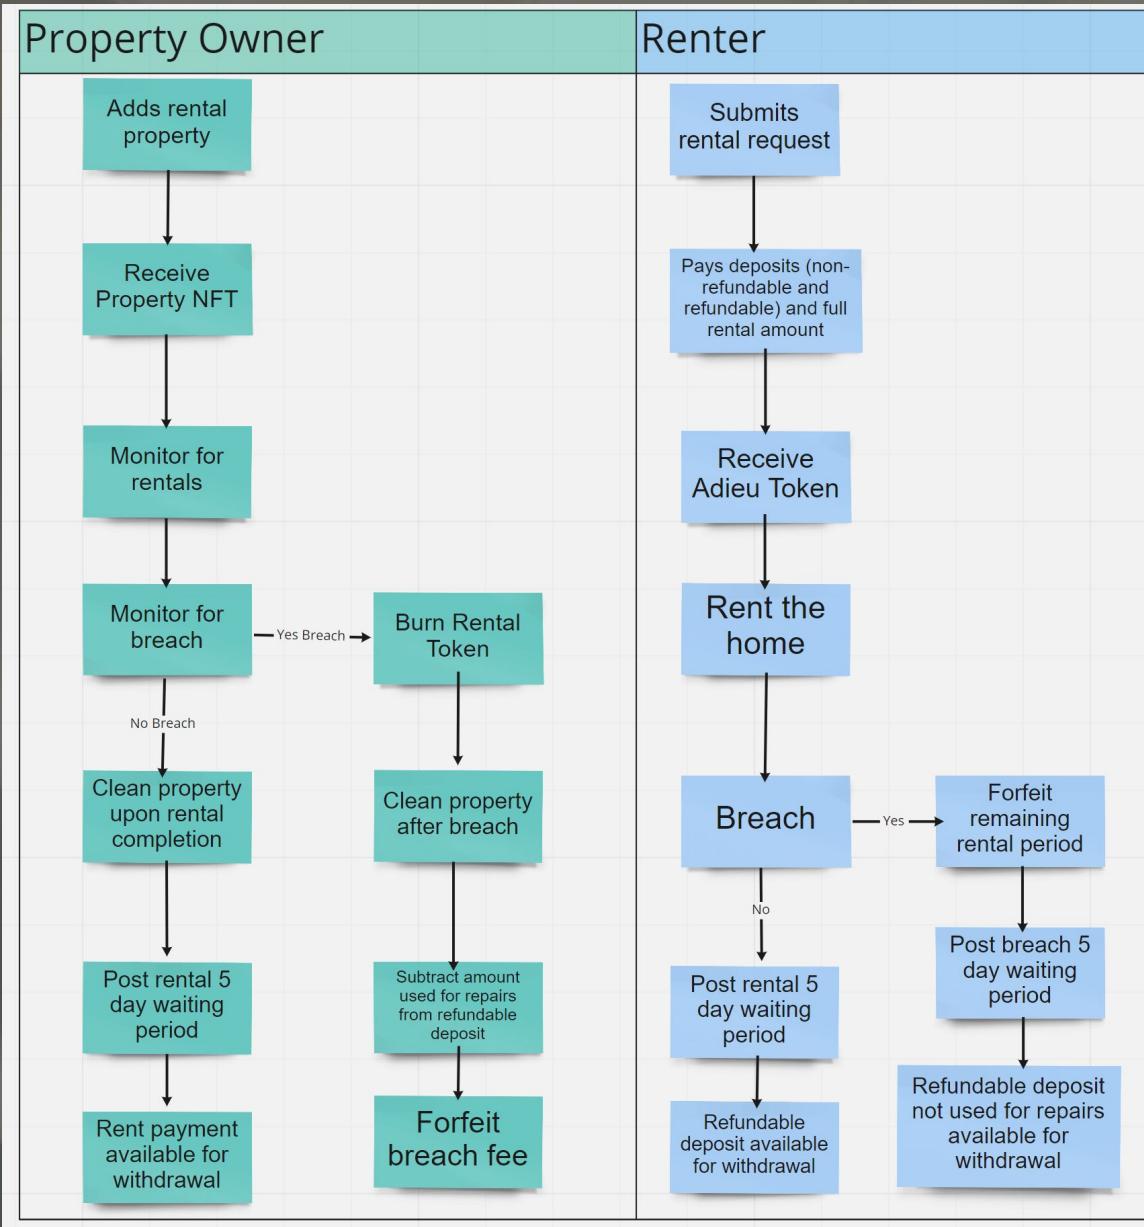

Security Roles

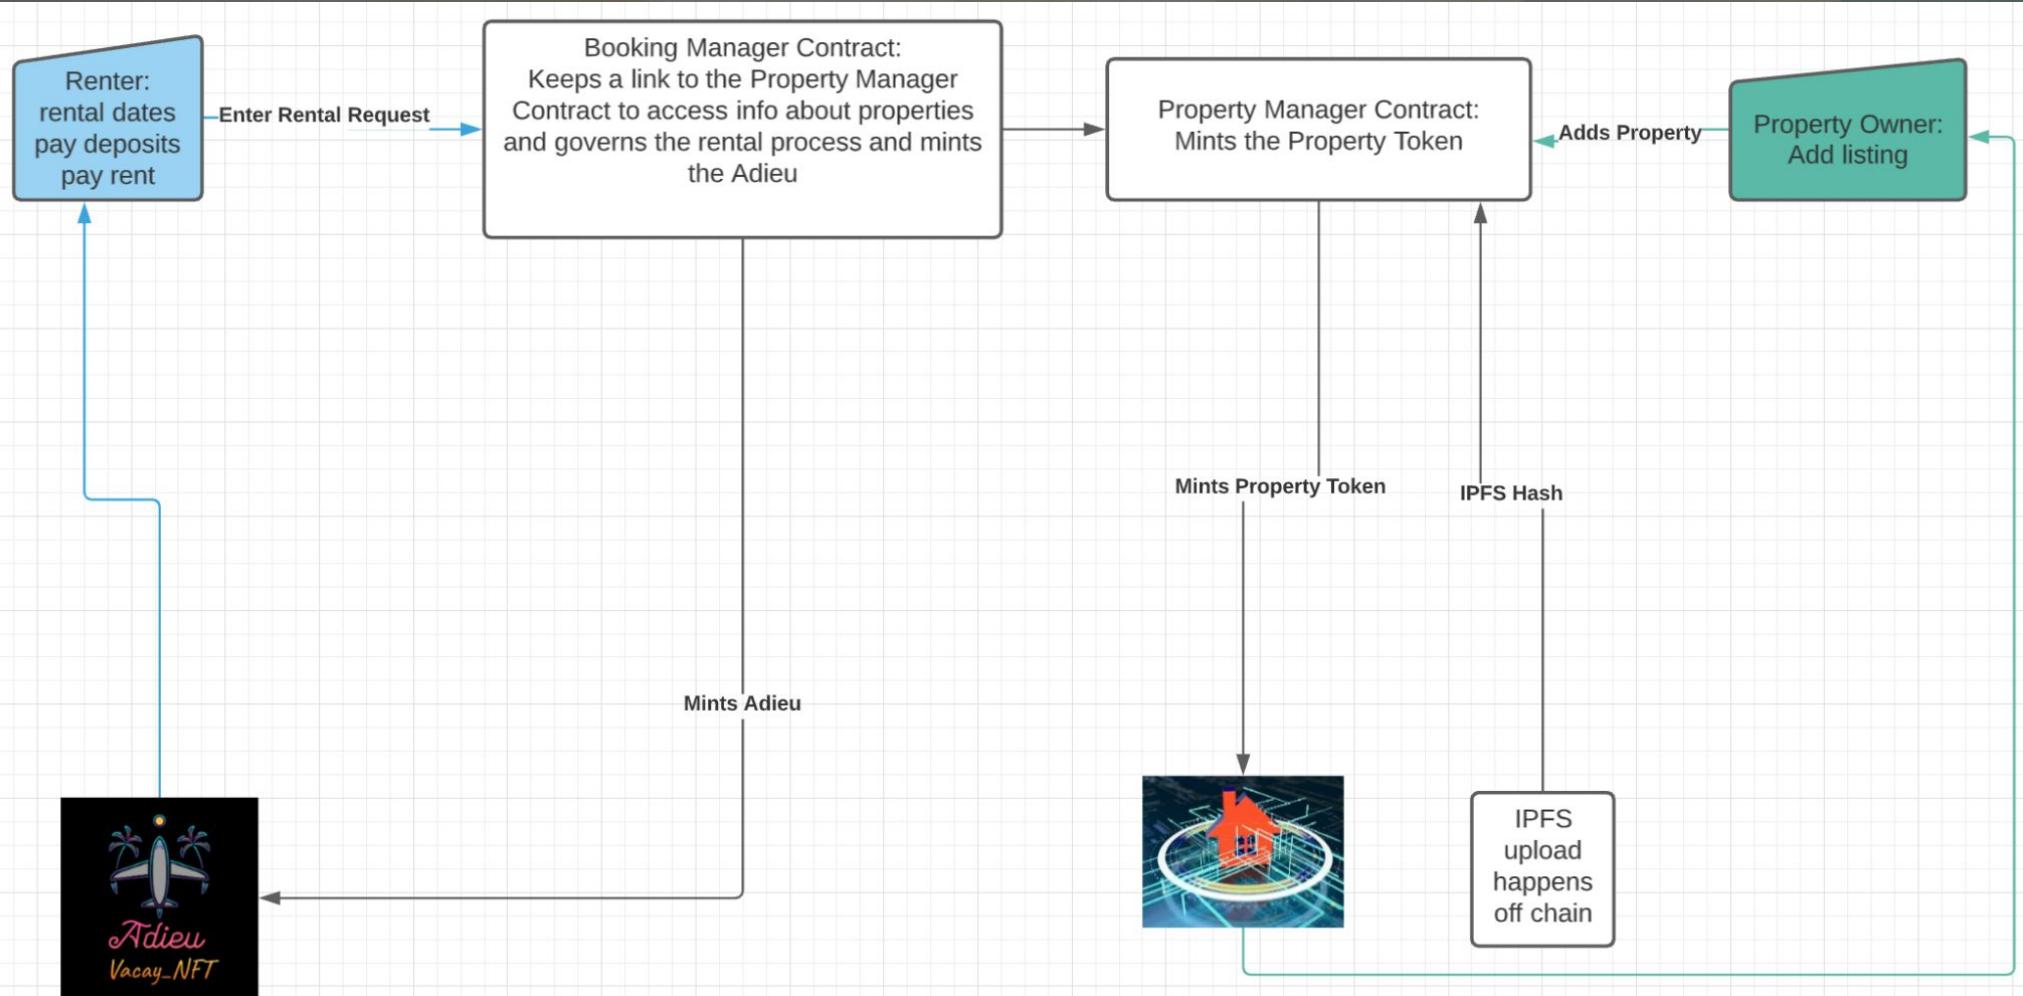

IPFS

User flow

Architectural flow

The Safeguards

Prisoner's Dilemma

Game Theory

No Middleparty

Adieu Platform is user-managed.

Public Users (**renters**) interact directly with token owners(**property manager**)

Contract Immutability

Once Launched - platform is self-executing

Listing Party - paid in 5 days

Rental Party - refund in 5 days

Efficient Breach

Token - Burn can be initiated by either party:

1. Property manager
2. Renter

Bilateral : Parity

Property Manager:

1. Lose entire rental
2. + 50% burn fee to platform

Renter:

1. Lose entire rental
2. Forfeit refundable deposit (1 extra week's rent)

Game Theory Cont'd

Win- Win

Egalitarian : Zero Counterparty Risk

- Contract - Centered
- Parties receive benefit of the bargain
- Code is dumb - but perfect
- Parties: incentivized to contract adherence

Lose-Lose

No Efficient Breach Possible

- On Chain = promises are rewarded
- Broken promises = severely penalized
- Off Chain: collateral contractual behavior - logged & notated

No: Win/Lose

Platform is Agnostic

- If parties behave accordingly to contract; platform and contract creators = neutral
- If parties breach contracts = enriches platform

The HOUSE doesn't Always win

Future Featuresets

- NFT <-> jpg Link : Property Capstone

Roles Designation

User-access-limited : on-chain permissions for appropriate contracts

On-Chain Listing

Website App dedicated to showcasing amazing properties and NFT owners

Active Front-End

React + MultiListing

Token Standard

ERC 1155 - properly manage user control / access

Keybox

Hash-Signed real estate Key Box -
Chain-enabled : linked to Property Listing

Reduce Gas &

IPFS - Mapped / Req' REVIEW SYSTEM

Only verified users can post to IPFS Listing

FORK - ETH- Adieu Validating Nodes

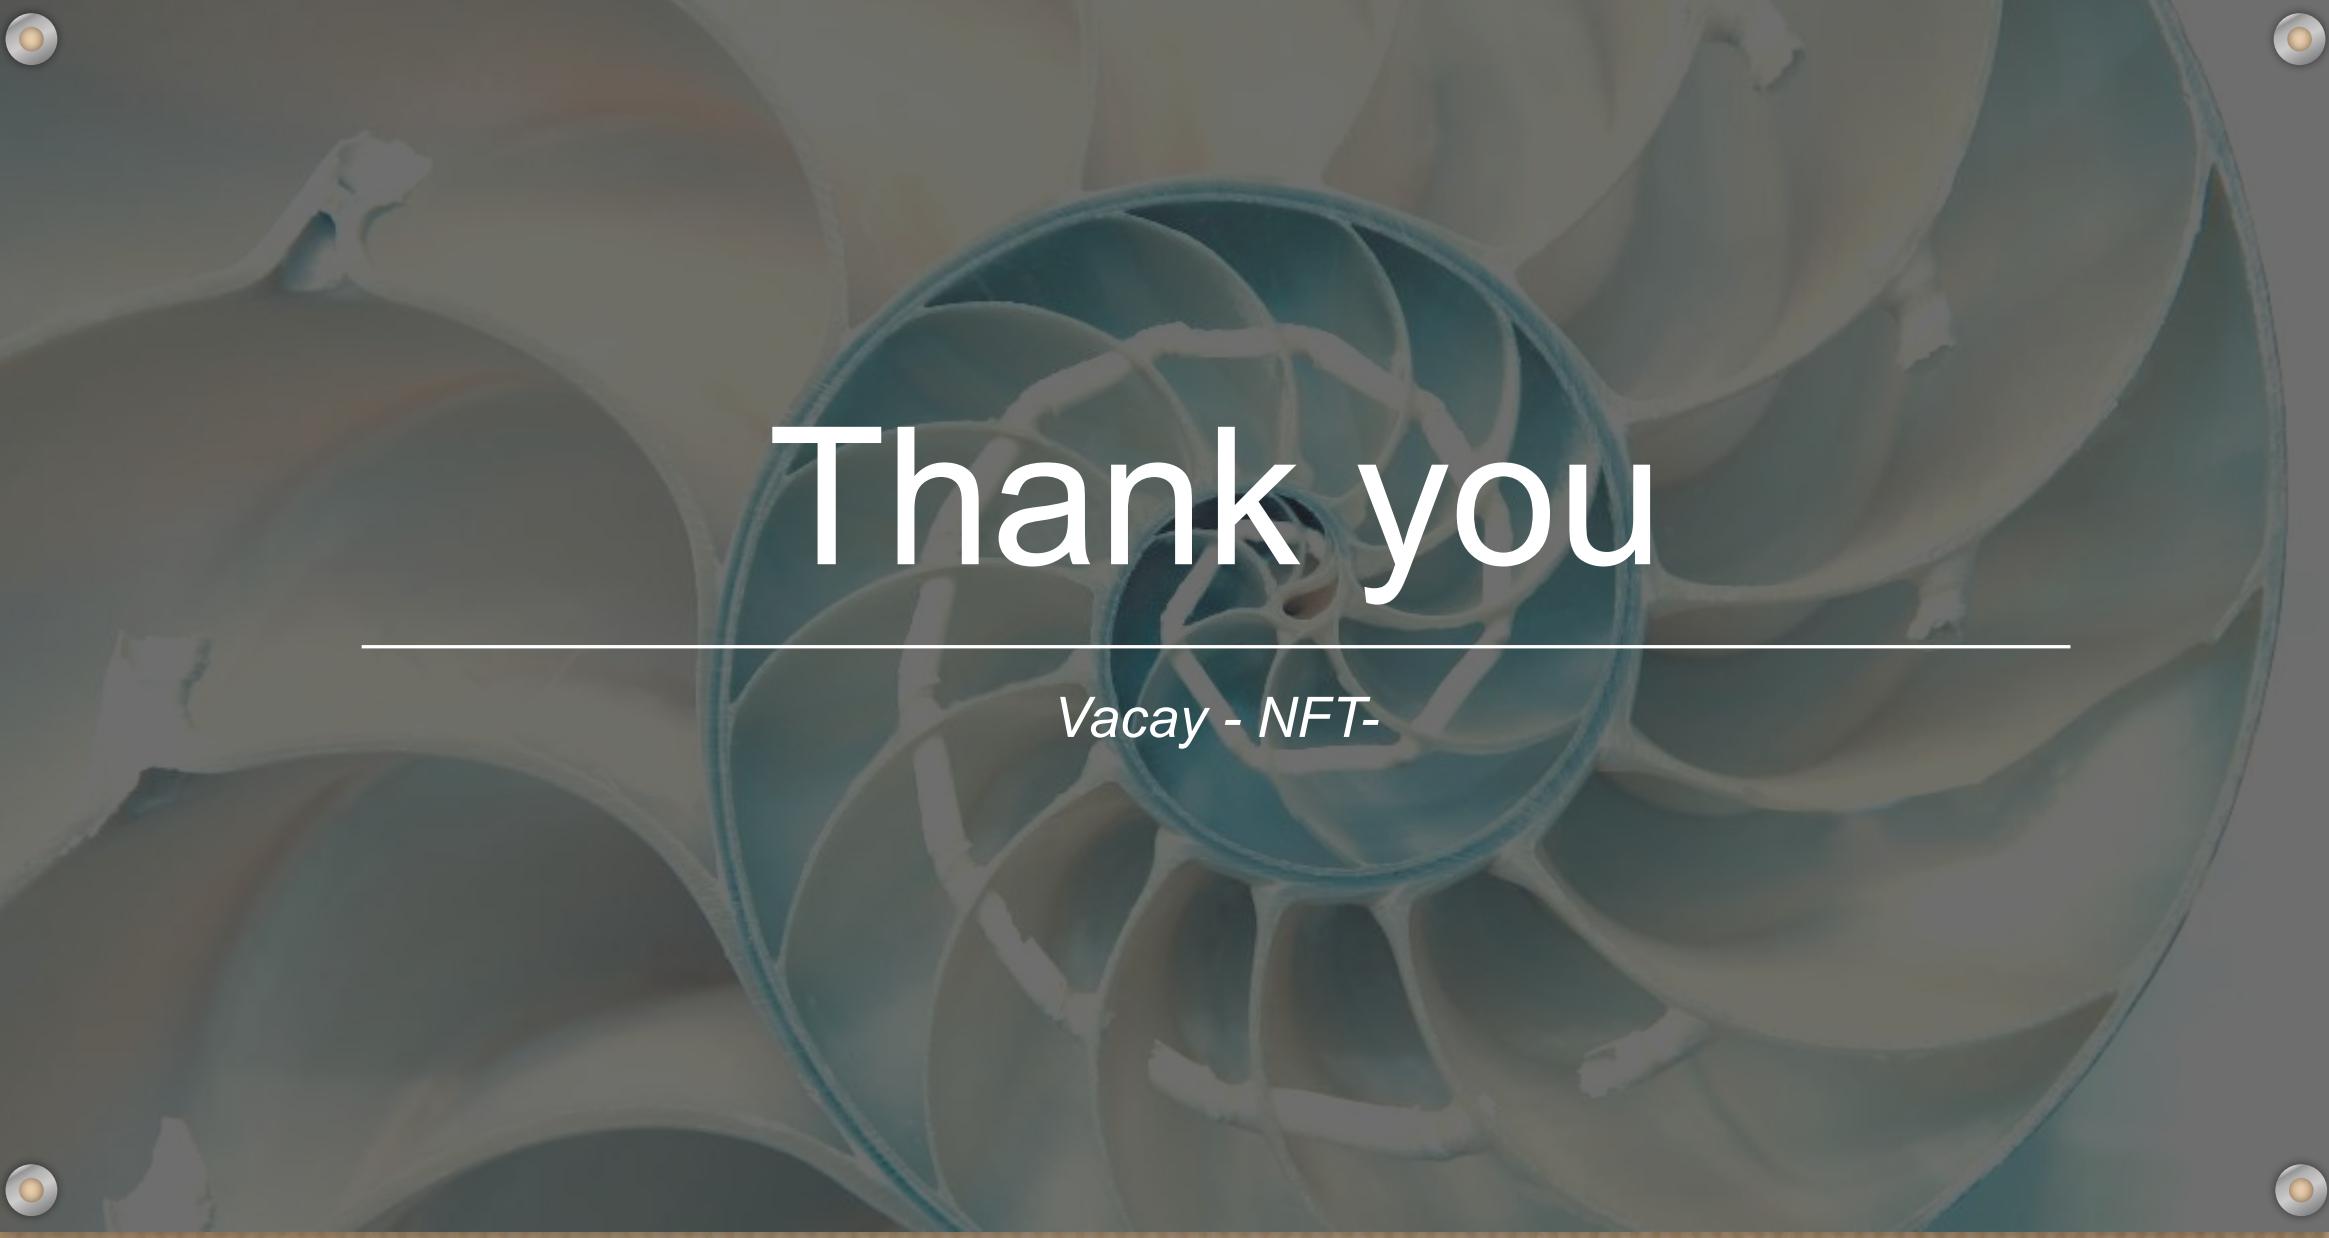

Nodes operate by proof of stake with its own currency (V_Token)

Stakes Increase as Network Traffic Increases

Buy Adieu Tokens - from past renters.

Or Slowly build V_Tokens from transaction validation +

Thank you
